

One Card - Anywhere Access

A PFCU Visa Debit Card has all the features of an ATM card - and more! It functions as a credit card, a check and an ATM card. Present your card the same way you would a credit card or a check for payment of your purchase and the amount will be authorized based on the available balance in your MCCU checking account. It's fast and easy with:

- Worldwide acceptance at merchants with the Visa logo
- ATM access to your savings and checking accounts 24/7
- Save by reducing the number of checks you write

There are two types of transactions when using your PFCU Visa Debit Card as a debit card - signature transactions and PIN transactions

Signature transactions - when you sign for the transaction to authorize the purchase. This is referred to as a credit transaction.

PIN transactions - when you enter your secret 4 digit personal identification number to authorize the purchase. This is referred to as a debit transaction.

In either case when you use your PFCU Visa Debit Card for purchases the funds will be deducted from your checking account. You also get free, unlimited transactions how ever you use your card (debit, credit, ATM).

When using your card at an ATM look for the CO-OP Network logo. Your transaction is **FREE!**
